

30/60/90 Onboarding Journey

A role-based onboarding program designed to reduce time-to-productivity and support managers with clear readiness criteria.

 ROLE-BASED LEARNING

 MANAGER ENABLEMENT

 LEARNING OPERATIONS

The Business Challenge

Inconsistent Onboarding Experiences

New Customer Success Managers were not reaching independence at the same pace. The absence of a structured framework created friction at every stage of onboarding.

Scattered Content

Knowledge spread across documents and informal explanations with no single source of truth.

Intuition-Based Readiness

Manager judgment replaced structured criteria, leading to inconsistent assessments.

Repetitive Explanations

Managers repeatedly answered the same questions, consuming time and energy.

No Measurement

Limited visibility into onboarding effectiveness or new hire progress over time.

A structured framework was needed to help CSMs become confident and productive faster.

Learning Needs Map

Each identified gap was mapped to its organizational meaning and translated into a targeted learning response.

Learning Response	Organizational Meaning	Identified Need
Role-based learning checklist	Knowledge is not easy to find	Repeated questions
Shared 30/60/90 framework	Inconsistent employee experience	Inconsistent onboarding
Conversation simulations	Slower customer-facing readiness	Lack of confidence
Workflow practice & tools training	Operational mistakes & dependency	Confusing tools
Readiness indicators & assessment	Managers rely on intuition	No readiness criteria
Centralized onboarding hub	Time wasted searching	Scattered knowledge

The 30/60/90 Learning Journey

A phased approach that moves new CSMs from foundational understanding to full independent ownership over 90 days.

Each phase has a clear goal, defined activities, and measurable readiness indicators — giving both managers and new hires a shared understanding of progress.

Day 0-30: Foundation

Key Activities

- Shadowing experienced CSMs in live customer interactions
- Tool navigation walkthroughs and hands-on practice
- Product basics and core platform orientation
- Introduction to internal processes and team structure
- Role expectations and success criteria overview

Phase Goal

Build basic role understanding and product knowledge so new CSMs can orient themselves confidently within the organization.

Ready if: Can explain the CS role and navigate core tools independently. ✓

Day 31–60: Practice

Key Activities

- Customer scenario simulations and role-play exercises
- Risk identification and escalation practice
- Workflow documentation and CRM usage
- Guided meeting preparation with manager feedback
- Peer review and structured reflection sessions

Phase Goal

Move from passive learning to guided practice. New CSMs begin applying knowledge in realistic customer scenarios with structured support.

Ready if: Can prepare for meetings and document needs with limited support. ✓

Day 61–90: Independence

Key Activities

- Full portfolio ownership with light manager oversight
- Complex customer scenario handling and escalation
- Stakeholder communication and relationship management
- Self-assessment against readiness indicators
- Final readiness review and 90-day debrief

Phase Goal

Build confidence for independent ownership. CSMs take full responsibility for their portfolio and communicate clearly with stakeholders.

Ready if: Manages standard interactions and communicates clearly with stakeholders.

Project Deliverables

Six core deliverables were designed to support every stakeholder in the onboarding journey — from new hires to managers to L&D operations.

Facilitator Deck

Full training deck with activities, scenarios, and facilitator notes for structured delivery.

Manager Checklist

Step-by-step manager guide covering all touchpoints across the 90-day journey.

Scenario Practice

Practical customer-facing simulations designed for guided, realistic practice.

KPI Dashboard

Metrics tracking completion rates, confidence scores, and knowledge assessments.

Learning Portal

LMS-style interface showing individual progress, resources, and completion status.

Knowledge Hub

Centralized Notion hub consolidating all onboarding resources in one accessible place.

Measurement & Program Impact

Key Performance Metrics

30-Day Completion Rate

90-Day Completion Rate

Average Knowledge Score

Shadowing Completion

Confidence & Readiness

4.3/5

Avg Confidence

Measured at Day 90 across all cohorts

4.2/5

Avg Readiness Score

Manager-assessed at end of program

Repeated question volume reduced by **32%** following program launch — a direct indicator of improved knowledge accessibility. 

Learning Impact & Strategic Value

Structured onboarding creates consistency, confidence, and faster time-to-productivity across the organization.

Role-Based Design

Learning tailored to the specific needs and responsibilities of Customer Success Managers.

Manager Enablement

Managers equipped with tools, checklists, and readiness criteria to support their teams effectively.

Readiness Assessment

Objective indicators replace intuition, creating fair and consistent evaluation across all new hires.

KPI-Based Measurement

Data-driven tracking of completion, confidence, and knowledge scores to continuously improve the program.

This project demonstrates how L&D supports business growth by creating a framework to support, assess, and improve employee readiness across a global high-tech organization.
