

30/60/90 Onboarding Journey

Reducing Time-to-Productivity Through Structured Role-Based Learning – a People Operations project by Ayelet Nogrian

Onboarding

Learning

Timeline

The Challenge

New Customer Success Managers reached independence at vastly different speeds. Knowledge was fragmented across documents, informal conversations, and repeated manager explanations – with readiness based on intuition, not evidence.

Why It Required Project Management

- Diagnosis of root inconsistencies
- Stakeholder alignment across functions
- Structured asset development
- Measurable readiness criteria

The Organizational Problem

No consistent onboarding structure meant every new CSM had a different experience – and managers bore the burden of filling the gaps repeatedly.

The Research

This project is grounded in academic and practical learning from graduate-level Organizational Development studies, analyzing onboarding effectiveness, role-based learning design, manager enablement, and employee readiness assessment.

Academic Foundation

Research on onboarding models, learning operations, and employee experience informed every design decision in this journey.

Stakeholders & Audience

New CSMs, CS team leads, HRBPs, L&D, Enablement teams, and cross-functional partners in Product, Support, and Operations.

Readiness Assessment

Practical frameworks for measuring confidence, knowledge, and behavioral readiness were adapted from validated research models.

Project Roadmap

From diagnosis to impact – a four-phase structured approach to building and deploying the onboarding journey.

1

Diagnosis

Identified inconsistent experiences, scattered resources, and unclear readiness criteria.

2

Planning

Designed a phased 30/60/90 journey with role-based goals, manager check-ins, and readiness indicators.

3

Execution

Created onboarding case study, facilitator deck, dashboard, learning portal, scenario practice, and content pack.

4

Measurement

Tracked completion, confidence, knowledge scores, shadowing, readiness, and repeated question reduction.

The Solution & Deliverables

A role-based 30/60/90 onboarding journey giving new hires and managers a **shared structure** – learning goals, activities, check-ins, scenario practice, readiness indicators, and measurable outcomes.

Learning Infrastructure

- 30/60/90 Onboarding Journey
- New Hire Learning Checklist
- Onboarding Hub (Notion)

Manager Enablement

- Facilitator Deck
- Manager Check-In Template
- 90-Day Readiness Assessment

Practice & Assessment

- Customer Scenario Practice Pack
- Canva Case Study
- KPI Dashboard + Learning Portal

Tools, Measurement & Results

The program delivered measurable improvements across all key readiness indicators – with a consistent framework that reduced repetitive manager burden significantly.

88%

30-Day Completion

86%

Knowledge Score

87%

Shadowing Completion

91%

90-Day Completion

32%

Fewer Repeated Questions

The Result

The program creates a consistent onboarding framework with measurable readiness, faster confidence building, and a **32% reduction** in repetitive manager explanations – freeing CS leaders to focus on performance, not repetition.

Technology & Design Stack

- PowerPoint – onboarding deck
- Canva – case study
- Excel – KPI dashboard
- Figma – CS learning portal
- Notion – onboarding hub
- AI Tools + GitHub – templates & portfolio

From Challenge to Solution: Executive Summary

A structured People Operations project – from diagnosis to measurable impact.

The Challenge

New CSMs onboarded inconsistently – knowledge was scattered, managers repeated answers, and readiness was based on intuition rather than measurable criteria.

The Research

Grounded in graduate-level Organizational Development research analyzing onboarding effectiveness, role-based learning, and manager enablement models.

The Solution

An end-to-end 30/60/90 onboarding program: structured journey, facilitator deck, scenario practice, readiness assessment, KPI dashboard, and learning portal.

The Result

88–91% completion rates, 86% knowledge scores, and a 32% reduction in repeated manager questions – with faster confidence building across the CSM team.

What This Project Demonstrates

Onboarding reimagined as a strategic People Operations project – combining diagnosis, design, enablement, and measurement into one cohesive, scalable system.

Project Management

End-to-end ownership from diagnosis through stakeholder alignment to delivery.

L&D Design

Role-based, phased learning journeys grounded in academic research and practical frameworks.

People Operations

Structured processes that create consistent, measurable employee experiences at scale.

Dashboards & Portals

KPI tracking, learning portals, and readiness tools built to give managers real visibility.

Impact Measurement

Defined success metrics tied to business outcomes – not just learning activity.

Project 2 · Ayelet Nogrian – **Portfolio-ready demonstration** of strategic L&D, People Operations, and measurable organizational impact.
