

Change Readiness & Learning Enablement

Turning Strategic Change Into Daily Work Adoption

PROJECT 3 · AYELET NOGRAN

The Challenge

Leadership communicated the strategic transformation — but employees and middle managers struggled to translate it into **daily work, role expectations, customer conversations, and new capabilities**.

Why This Required Project Management

The challenge demanded structured execution: diagnosis, stakeholder alignment, asset development, implementation, and measurement — not just learning content.

The Organizational Gap

Strategy was declared. Adoption never followed. The message landed — but the behavior change didn't.

Research Foundation & Audience

Academic Foundation

Grounded in graduate-level organizational development research analyzing strategic transformation at global tech companies — including **Meta's Metaverse pivot** and **Autodesk's cloud subscription transition**.

Stakeholders & Target Audience

Employees &
Managers

Customer-Facing
Teams

HRBPs & L&D

Regional & Executive
Leaders

Project Roadmap

From diagnosis to impact — a structured four-phase change enablement model.

Each phase was sequenced to ensure that strategy connected to capability, and capability connected to measurable behavior change at the team level.

The Solution & Deliverables

Key Deliverables

Facilitator Deck	Change Narrative Map
Role Impact Map	Skills Gap Sprint
Manager Conversation Guide	Resistance Response Guide
Change Adoption Dashboard	Learning Portal & Knowledge Hub

A 5-Week Blended Journey

From **awareness to adoption** — employees and managers moved through role impact, skills gap analysis, structured conversations, and team-level action planning.

Designed for global technology teams navigating organizational transformation in real time.

Tools, Measurement & Results

86%

Completion Rate

Program completion across participating teams

2.9→4.2

Change Clarity

Pre- to post-program clarity score

3.0→4.3

Manager Confidence

Manager readiness score improvement

72

Role Impact Maps

Completed by employees and managers

1,850

Hub Visits

Knowledge hub engagement post-launch

The Result

A measurable change adoption framework that built clarity, readiness, and manager confidence — while creating lasting infrastructure through role impact maps and a live knowledge hub.

From Challenge to Solution: The Full Story

A structured summary of how this project moved from organizational problem to measurable impact.

The Challenge

Employees and middle managers could not translate leadership's strategic communication into daily work, role expectations, or customer conversations. Adoption was stalling despite clear messaging from the top.

The Research

This project is grounded in graduate-level organizational development research analyzing strategic transformation at global tech companies — including Meta's Metaverse pivot and Autodesk's move to a cloud subscription model.

The Solution

A 5-week blended change enablement journey — including a facilitator deck, role impact maps, skills gap sprint, manager conversation guide, adoption dashboard, and a learning portal — enabling managers to act independently and teams to adopt change with clarity.

The Result

Change clarity improved from 2.9 to 4.2. Manager confidence rose from 3.0 to 4.3. 86% program completion, 72 role impact maps completed, and 1,850 knowledge hub visits — a fully measurable adoption framework.

What This Project Demonstrates

Translating academic research and organizational theory into a **practical, end-to-end change enablement solution** that connects strategy, people, managers, learning assets, and business readiness.

Project Management

Structured execution across diagnosis, planning, build, and measurement phases.

L&D Design

Blended learning assets mapped to role impact and capability gaps.

Impact Measurement

KPI-driven dashboards tracking clarity, confidence, and adoption in real time.

People Operations

Manager enablement tools and knowledge infrastructure built for scale.
